## FaceTime

Phone calls like you've never seen before.

People have been dreaming about video calling for decades. iPhone 4 makes it a reality. With the tap of a button, you can wave hello to your kids, share a smile from across the globe, or watch your best friend laugh at your stories — iPhone 4 to iPhone 4 over Wi-Fi. No other phone makes staying in touch this much fun.

## Using Copyright-friendly Images Effectively in Presentations

Yesterday on April 25, 2011, I shared a workshop for faculty and staff at [Western Oklahoma State College](#) in Altus titled, "Using Copyright-friendly Images Effectively in Presentations." The recorded audio from this workshop is available in two parts on my secondary "[Fuel for Educational Change Agents](#)" podcast channel. ([part 1](#) and [part 2](#)) Referenced resources are available [on the presentation wiki](#) as well as [the Images page of talkwithmedia.com](#). The workshop included two main themes: Guidelines for using copyright-friendly media as well as complying with fair use law, and using images effectively in presentations following "[Presentation Zen](#)" [guidelines](#). When choosing media to use in a presentation or project, I recommend using the following sources in this order:

1. H: Homegrown or Public Domain
2. C: Creative Commons licensed media
3. F: Fair Use (copyrighted media used under fair use terms)

# Digitizing an Elementary Writing Portfolio

[Edit this post](#)

Hello there! If you are new here, you might want to [subscribe to the RSS feed](#) for updates on this topic.

Today my fifth grade daughter, Sarah, brought home her elementary writing folder. This folder includes samples of her writing dating all the way back to first grade, and she's never been able to bring it home previously. She was excited to read me several of her essays, so I suggested we record them on the iPad so they'd be preserved digitally. I'm sure at least her grandparents will be interested in listening to her read these expressively! My desire to digitally document these "evidences" of her learning in elementary school are strongly influenced by H. Songhai's 2008 K-12 Online Conference presentation, "What Did You Do in School Yesterday, Today, and Three Years Ago," and my experiences last May with my son documented in the post, "Throwing away 6th grade - OR - The case for online portfolios." Tonight we needed a fast way to photograph Sarah's work, audio record her reading of different essays, and share both media artifacts online. To do this, we utilized a [free account](#) on AudioBoo, an iPad2, and an iRig microphone.

Stay updated!
